Problem statements

Choose any one problem statement — 3 winners in this track

01 Stale-answer detector

LLM apps confidently cite facts that changed (pricing, API versions, laws, leadership). Build a layer that takes any LLM answer, flags claims likely to have gone stale, and re-verifies them against live sources with a freshness score per claim.

02 Pre-meeting briefing agent

Given a company or person and a meeting time, produce a one-page brief covering the last 30 days of news, hires, launches, and open questions, with every claim sourced.

Prizes in Tavily credits (USD) — **$30K · $20K · $10K**
